DETAILED ACTION

Restriction/Election

Specie Election Requirement:

This application contains claims directed to the following patentably distinct species of the claimed invention:

Specie A: a parameter that is ecotype

Specie B: a parameter that is tissue

Specie C: a parameter that is RNA type

Specie D: a parameter that is harvest conditions

Specie E: a parameter that is genotype

Specie F: a parameter that is growth conditions

Specie G: a parameter that is growth media

Specie H: a parameter that is treatments

Specie I: a parameter that is a combination

(If Specie I is elected, then please select a particular set of parameters for the elected combination)

Applicant is required under 35 U.S.C. 121 to elect a single disclosed specie for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. The distinctness or independence of the various parameters is because each

Art Unit: 1631

contains distinct features not required by the other parameters. These species are distinct as requiring different features thereof without overlapping subject matter due to the divergent subject matter. This lack of overlapping subject matter documents the undue search burden if all species were examined together.

Applicant is advised that a reply to this requirement must include an identification of the specie that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should an applicant traverse the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these species are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1631

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement may be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
